4. [redacted] Talked with Sam Archibald concerning Congressman Moss' statements that more information should be available to the public on Soviet satellites generally. I indicated that there were some extremely sensitive areas on this general subject and Mr. Archibald stated he was fully aware of this as was the Chairman and it was not their desire to press into these true security areas. He volunteered the fact that a hearing was being held next Monday with Arthur Sylvester as the witness to go into this matter. He offered to have the Agency sit as an observer if we desired, merely suggesting that we clear it with Colonel Dillinger of DOD L&L. I thanked him for this and offered to be of assistance explaining the sensitivity if this were necessary. Archibald was appreciative and said he might call on us in the future.

5. [redacted] John Conway and George Murphy of the Joint Committee on Atomic Energy visited the Agency and had lunch with the Director with Scoville, Cline and Warner present. There was some general talk about the nuclear test ban treaty and the U. S. atomic energy program. At the close, the Director indicated that he would like to brief the JCAE for about an hour on the Chinese Communist atomic energy program. Conway said he thought this would be helpful and thought he could work it in for an hour one day next week. However, they are to advise us on a specific date.

After the luncheon, I took Conway and Murphy on a tour of the building showing them various spots of interest. They were extremely interested and appreciative and finally left at about four o'clock.

6. [redacted] Talked with Robert Smart in connection with the date of the hearing next week. Mr. Smart indicated that the Chairman had mentioned something about a hearing Tuesday or Wednesday but other Subcommittees were already meeting. After discussion with the Director, I advised Smart that it was the Director's preference that the meeting be put over until the following week and Smart said he would do what he could.
